

To whom it may concern,

We (RXT) have used the services provided by BIGLIFT on one of our North Sea operations. BIGLIFT provided excellent training, supervision and practicable hands on advice to the crew. All training requested was completed in a timely manner and we received positive feedback on how the training was received. BIGLIFT also conducted lifting equipment inspections and updating lifting registers.

We are now in the process of having BIGLIFT become our main advisors and trainers to the company in our worldwide operations.

If any further details are required of the work carried out by BIGLIFT please use the contact details below.

Regards

Phil Bigg
